ABSTRACT

According to Christian theism, the bible has effectively expounded how god-like has made the universe. Cosmologist Stephen Hawking has advanced the idea that, 'God does not exist' is not been sold. He trusts that universe is not been made by the flip of almighty. The famous physicist said that there is no legitimate clarification in the Bible and there is all the more convincing answer of the universe cause through science. He has confidence in the way that supernatural occurrences do not happen, everything is science.

1. INTRODUCTION

1.1 Following are the contentions of Stephen Hawking against God

1.1.1 It's Equitable Science.

His first contention can be compressed just by saying that God-like is trivial and that the philosophy of a Maker has in days of yore been utilized as a substitution for amend understanding about reality.

Stephen Hawking stated, "Obliviousness of nature's ways driven individuals in old circumstances to create divine beings to reign over each part of human life."

1.1.2 Universe: Self-Constructed or Not!!

Famous nonbeliever, Stephen Hawking once said, "Many individuals don't care for the possibility that time has a start, likely in light of the fact that it likens to divine intercession."

To accumulate learning with respect to the inception of a universe, Stephen Hawking created a couple of ideas. However, his ideas neglected to answer the "why" question of presence, in this way he took up the consequent proposal which expressed, "In light of the fact that there is a law like gravity the universe can and will make itself from nothing. Unconstrained creation is the reason there is an option that is instead of nothing, why the universe exists. It is not important to summon God to light the blue touch paper and set the universe going." But let's get straight to the point around few focuses here.

Initially, when Stephen Hawking indicates "the universe can and will make itself from nothing", the "nothing" he's talking

about isn't the perfect meaning of the word (i.e. "no-thing", non-being). In a perfect world, he is alluding to "something", for this situation to gravity, space, quantum vacuum, likewise a deck of laws at work known as M-Theory.

1.1.3 No Supernatural occurrences.

Discussing supernatural occurrences advances Stephen Hawking's third contention against God, which suggests, his trust in the idea of logical determinism, "there are no wonders or exemptions to the laws of nature."

Stephen Hawking trusts that infringement of nature rules can't occur because of which wonders can't be performed suggesting God doesn't exist.

1.2 Proving presence of God/demonstrating Stephen Hawking's belief system isn't right

1) Stephen Hawking's is not having complete Supreme inkling(idea)/learning.

On the off chance that one needs to demonstrate something utilizing rationale, that something or somebody doesn't exist, one ought to have total learning.

For instance: On the off chance that I create an impression "there are the same kinds of KitKat accessible in India other than chocolate"

For instance: In the event that I create an impression "there are the same kinds of KitKat accessible in India other than chocolate"

So to end up being right, I would need to go to every single shop, home, supermarket, shopping center and search for various kinds of KitKat.

On the off chance that I find Diverse kinds of KitKat other than chocolate, at that point my announcement about kinds of KitKat not existing in India would not be right while In the event that I go to a store that doesn't have distinctive kinds of KitKat, yet they get diverse flavors couple of minutes after I leave, and still, at the end of the day the announcement made by me would be demonstrated off-base.

So to demonstrate my announcement redress I should be available wherever in the meantime.

2. TO PROVE THE LAW OF GRAVITY GOD-LIKE IS ESSENTIAL

Stephen Hawking trust that "Enormous detonation "was an unavoidable purpose behind the production of the universe.

His announcement was on the grounds that there is a law, for example, gravity, the universe can and will make itself from nothing unconstrained creation is the reason there is an option that is instead of nothing, why the universe exists, why we exist. It is not important to conjure God to light the blue touch paper and set the universe going.

His announcements are on the grounds that there is the law of gravity, the universe makes itself from nothing.

Be that as it may, from where did the law of gravity come if there is no driving force behind the making of the universe.

Since Law of gravity is a reality so it demonstrates that something administers the universe (arrangement of law).

The arrangement of law is the law of universe was made by God and nobody else.

Since Stephen Hawking accepts and underpins M-Theory, he has likewise expressed

"M-Theory is the main contender for an entire hypothesis of the universe."

While 'M-Theory' can be expounded as-

A prime mover and an inventive compel that is all over the place and no place. This compels can't be recognized by instruments or analyzed by fathomable scientific forecast, but then it contains all potential outcomes. It joins ubiquity, omniscience, and power and it's a major secret.

This 'huge puzzle' can be expressed as God in light of the fact that the Omnipotent can be portrayed as-

What we have faith in something, which is available around us and now and again felt, however, can't be seen(invisible frame), I.e. Something present wherever in the type of nothing.

3) Law of rationale is fragmented without God

To comprehend whether any announcement is valid or false and discerning or unreasonable it is basic to have 'laws of rationale'.

Laws of logic are...

Law of Personality:-

To say that burger is a burger, a pen is a pen we need the law of identity.

For us to know that the statement is the rational law of identity, it is mandatory.

Law of No logical inconsistency:-

This law is around, 2 realities can't be valid and false in the meantime.

One of them must be false if another is genuine proclamation.

Best case to clarify above is "I contemplated yesterday "and "I couldn't think about yesterday.

Law of barred center

The above law expresses that one of the announcement will be valid or false, no center circumstance happens.

The case I am having dark hair, proclamation can be either my hair is dark (genuine) or my hair is not dark (false) but rather it can't have any center circumstance, for example, it perhaps dark.

Christian theist says the law of rationale is given to us by God.

They say God is truth or side of truth and underhandedness is false or side of false.

That is the reason law of rationale is given to us or originated from God itself.

Without the law of rationale, we couldn't perceive contrast amongst genuine and false explanations.

All things that exist have the motivation to exist

Since we as a whole realize that universe is made by a mastermind.

It is impractical that universe has made itself or with no reason it appeared.

Some agnostic ask that "Who Made God", however, Omnipotent is unfading he generally existed; no one made him it was he who made the universe and us for reasons unknown.

Everything accompanies a reason no things occur with no reason.

Each question has a reason for its reality.

3. SCOPE

Since science has dependably been gainful and has demonstrated numerous things there is a characteristic affinity that science is simple and can clarify nearly everything without exception.

Astrophysicist Robert Jastrow a self-portrayed skeptic expressed the seed of everything that has occurred in the universe was planted in that first moment; each star, each planet and each living animal in the universe appeared, because of occasions that were gotten under way at the time of the grandiose blast.

Researchers are some place persuaded that world was begun by sudden blast of light and matter, which started the begin of space and time

Stephen Hawking likewise expressed that universe was made with Enormous detonation blast.

What caused the sudden blast of light and matter is yet to be clarified by science.

The presence of universe was not always, but how it started is as yet a riddle and there is no elaboration for an unexpected blast of light and matter by science.

4. STEP BY STEP SOLUTION

There are various mysterious and unknown facts in this world which science is yet to prove.

One of the most amusing ones is Mt.kailash which is having religious sentiments in not only Hindu mythology but also Buddhism, Jainism, Ayyavazhi religion and much more.

Hindu religion followers believe it to be the residence of Lord Shiva, who has a great significance in creation as well as the destruction of the universe.

Tantric Buddhist believe that Buddha Demchok, depicting happiness of theology reside in Mt.kailash.

Hindu mythology has a belief that anybody who completes 108 parikramas around Mt. Kailash is believed to be enlightened which means "Moksha" or journey towards "Heaven" after life.

Taking Parikramas around Mt.kailash, localities of Tibet also believe it to be a journey towards enlightenment.

They say it nykhor instead of parikramas.

Nykhor means "circle around a sacred place".

Both religion beliefs are similar which is worth to believe that God exists and its importance in our life.

In fact, Mt.kailash is "Axis Mundi" which is disclosed by NASA.

Mt.kailash which is such a sacred place is said to be a balance of the world, hence it is in the center of the world.

It is a cosmic axis in Hindu Vedas which means the link between "Earth and Heaven".

According to Hindu mythology Lord Shiva resides in Mt.kailash and is Lord of destruction/Lord of death, he is the connection between Earth and Heaven again proving the existence of God and his importance in every individual's life.

How do we know there is the god? Does really god exists? Is there any creator?

This entire universe could not possibly come into existence on its own. Each and every object must have been developed by something or someone.

Where did this entire object come from? There must be someone who must have been created this or were they created by themselves?

Quran says, Not a single person can see or hear God, not even the prophet Muhammad.

Even we are not able to use our senses to make some kind of contact with God.

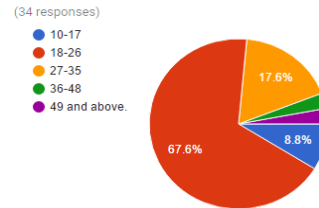

In Islam, people are encouraged to use their senses and common sense to believe that this entire universe could not possibly come into existence on its own. There must be something who had to design this entire universe and put it into motion.

All this is beyond our ability to analyze and decide the exact result of it, yet it is something we can understand and believe. For eg. We don't have to see Potter to recognize dishes, plates, pot etc.

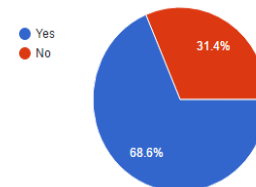

Because we have the ability to recognize dishes and pots without seeing the Potter who created it. In the same way, we can believe God created everything without having to see, touch or hear him.

5. RESULT

To which age group you belong? (34 responses)

Do you believe in God? (35 responses)

If yes, why do you believe in God? (9 responses)

Only he can create this magnificent world with such perfection

Faith Believes

It's strong power which protects in bad times n also gives us good times of our life.

1. For me god is a power to help u believe in hope when ur in worst circumstances.
2. God is like that good in every person which has to coexist with that every bad in every person. Because in universe every equation has to be balanced equation to be stable.
3. God is every that thing which helps to differentiate good from bad and right from wrong.

I believe because he gives me positive vibes and strength to fight problems

Because when I pray something it happens

According to my indian tradition ..what i feel is God is nothing but the higher possibility of an human to where human can achieve.

There has to be a creator

Because I have experience of seeing ghost or an evil energy you can say, so if negative is there positive Has to be there.

However, I do believe in God and spiritual existence.

If no, why don't you believe in God? (12 responses)

It's only power and don't have any specific form

They used to exist but not now, I believe that there were some super species.

I have not seen him/her

Coz I have not seen any.

bcoz I don't SEE God.

God was an imagination of our ancestors used to create unity amongst their clan

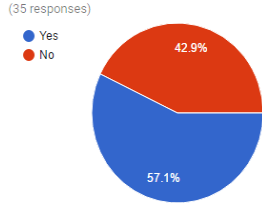

None

Even a Atheist not believe in god bcoz he accept that their is something in which others believe they call it God

Cz i believe in me for doing any kind of work

God and all religions in this world were created by human beings, their thoughts, their fears manifest as God, if God hates injustice, why is there injustice in this world, if God hates inequality, why did he make someone rich and someone impoverished or poor for that matter? Why are there crimes in this world if God condemns them and in all understandable views has powers to stop them, but doesn't? There is a far better peace accepting that there is no God than there is by accepting one.

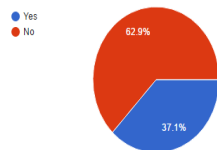

Do you think God created universe? (35 responses)

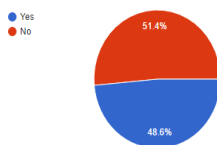

If no, please specify your view. (13 responses)

- It's science
- Nature created god.
- Science is the cause
- The big bang did.
- Some super power created universe which may exist or may not exist now.
- No specific proof
- God for me is power to keep things in equilibrium. So it has nothing to create and destroy. Universe what we know is invented by man and quoted in dictionary the meaning for this word "Universe" so universe is made by man but equilibrium maintained by god
- I have learnt it in school
- There no proof of god in universe
- There is a theory propagated by the scientific community which goes by the name 'big bang theory'. It provides logical explanation of how the universe was created. It is still debatable though. But in all realms of explanation, a hypothetical entity is the last thing that created the universe.

Stephen Hawking says God doesn't exist. Do you support his argument? (35 responses)

For physicist, just to acknowledge science have not yet proved how did 'Big Bang' got initiated. Do you still believe, God Doesn't exist? (35 responses)

6. CONCLUSION

through the brief study and review we have done on theory for god's existence. Thus we can conclude from our theory that, "The God exists!! Sir Stephen Hawking can be proved wrong of his contentions." By considering all the debatable points every individuals may have on it respectively. Majority of the human population as per graphs used in this paper will agree on the positive power, deeds and faith.

7. ACKNOWLEDGMENT

We thank our colleagues from Thakur Institute of Management Studies, Career Development, and Research who provided expertise and insight that greatly aided the research. We also thank Prof. Sudarshan Sirsat for assistance with proper IEEE format, methodology, and techniques that improved the document.
